CAREER OBJECTIVES

Highly ambitious and results-driven Software Engineer with experience in backend frameworks (NestJS, Express.js) and cross-platform development (Flutter, Next.js, Native Android). A quick learner with strong problem-solving skills, backed by competitive programming experience and a solid DSA foundation, enabling rapid adaptation and delivery of optimized, production-ready solutions.

EDUCATION

International University of Business Agriculture and Technology

Bachelor of Science in Computer Science and Engineering | CGPA: **3.94/4.00**

Dhaka, Bangladesh

January 2022 – January 2026

Skills

- **Programming Languages:** C, C++, Java, Dart, JavaScript, Python. Proficient in **object-oriented programming** and **Data Structure & Algorithm**.
- **Database Management:** SQL (MySQL, PostgreSQL, SQLite), NoSQL (MongoDB, Firebase Realtime Database).
- **Technology & Framework:** Native Android (Java), XML, Flutter, NestJS, Express.js, Git.
- **Tools:** Linux(Ubuntu), Android Studio, VS Code, CP editor, Codeblocks, GitHub, Jira, Bitbucket.

Work Experience

Software Engineer Intern, Grameen HealthTech Limited

October 2025 – February 2026

- Built a cross-platform Alarm Service by developing a NestJS Medicine Reminder API and a Flutter module for Android/iOS, delivering reliable scheduling and notifications - in the live Shukhee app.
- Developed a full-stack Admin Feedback Dashboard, implementing an Express.js API for data collection and response handling, along with a Next.js frontend featuring a responsive UI and advanced filtering; successfully launched on the Shukhee Admin website.
- Built a Shop-in-Shop Proof of Delivery (POD) system with secure 6-digit code generation, validation, and SMS notifications for order confirmation; also implemented Proof of Return (POR) functionality to streamline delivery and return workflows.
- Wrote Jest automated tests for backend APIs to ensure reliability.
- Collaborated in Agile sprints using Jira for task management and Bitbucket for version control.

Projects

WorkPulse API [Node.js, TypeScript, Express.js, PostgreSQL, Knex, Joi] Platform: Backend | [Source Code](#)

- A production-grade workforce management REST API featuring JWT authentication with rate-limited login, employee CRUD with photo upload, attendance tracking with upsert logic, and monthly attendance reporting, built with secure middleware (Helmet, CORS), Joi validation, pagination/search, and centralized error handling using a scalable controller–service–repository architecture.

GaariHaat App [Flutter, GetX, NestJS, MySQL, Socket.IO] Platform: Android/iOS/Web | [Source Code](#)

- A full-stack vehicle marketplace ecosystem featuring with real-time listings, secure JWT authentication, SSLCommerz payment integration, favorites, profile & listing management, backed by a NestJS REST & WebSocket API and a dedicated admin panel for complete marketplace control.

eCommerce-Solution-of-used-Car-bike [TypeScript, NestJs, MySQL] Platform: Backend | [Source Code](#)

- A robust and scalable NestJS backend for an e-commerce platform dealing with used cars and bikes, featuring a full REST API with WebSocket integration for real-time updates, structured user, vehicle, and payment management, and secure entity relations.

eGuidance App [Java, Firebase, XML] Platform: Android | [Source Code](#) | [Live Demo](#)

- A mobile application that connects users with doctors for mental health support, featuring role-based access (admin, doctor, user), real-time chat with doctors, appointment booking, user profile management, doctor approval by admin, and health condition awareness test resources.

GariBD App [Java, Volley, XML] Platform: Android | [Source Code](#) | [Live Demo](#)

- A responsive Android marketplace for second-hand cars and bikes in Bangladesh featuring user authentication, dynamic listings with image uploads and filters, favorites, support email, profile management, and smooth navigation with user-friendly interface.

Tickr App [Flutter, Dart, Hive] Platform: Android/iOS/Web | [Source Code](#) | [Live Demo](#)

- A lightweight cross-platform task checker application built with Flutter and Hive, featuring local data persistence, real-time UI updates, swipe-to-delete interactions, clean Material Design UI, and optimized state management for efficient offline-first performance.

GroceryList App [Java, SQLite, XML] Platform: Android | [Source Code](#) | [Live Demo](#)

- A user-friendly Android application for managing daily grocery lists, featuring intuitive add, update, delete operations, and local data storage with SQLite database for offline access.

Personalized Recommendation API [Python, FastAPI, SQL Alchemy] Platform: Backend | [Source Code](#)

- A production-ready, scalable recommendation API built with FastAPI following Clean Architecture principles. This system provides intelligent, personalized product recommendations based on user behavior, demographics, and engagement patterns.

Achievements and Problem-Solving Experience

Achievements:

- **Ranked Top 15th:** IUBAT Collaborative Programming Contest - IUBAT_Fofular_Bots
- **Ranked Top 16th:** Dhaka Divisional Hackathon 2024 - Technocrats V.2: IUBAT_SHADOW_MASK
- **Ranked 22nd:** UAP Collaborative Programming Contest (Senior category) - IUBAT_Fofular_Bots
- **Honourable Mention:** ICPC Dhaka Regional Contest 2023 – BUBT: IUBAT_Fofular_Bots
- **Academic excellence** with 7 times SGPA **4 out of 4** and recognized as **Scholar**

Problem Solving Experience:

- [Codeforces \(MHR_\)](#): Pupil, Max Rating: 1203 Solved: 600 Problems Participation in rated Contest: 70
- [Vjudge \(rabbi0123\)](#): Solved 139 Problems
- [Leetcode \(MHR_221\)](#): Solved 103 Problems
- Total problem solved across all judge: 950/1000

PUBLICATION

Emotion Detection from Banglish Social Media Texts Using Transformer-Based Models.

[Certificate](#)

Accepted | ICCIT | Not online yet

PROFESSIONAL TRAINING CERTIFICATION

Mobile Application Development

[Certificate](#)

- *Jagannath University, under EDGE Project – ICT Division (80 Hours)*

October 2024 – April 2025

Extra Curricular Activities

- **Academic Mentor**, Department Of CSE, IUBAT *August 2022 – August 2023*
- **Deputy Manager**, Programming Wing, IUBAT IT SOCIETY *August 2023 – December 2024*
- **Competitive Programming Trainer** Level-0, Level-1 *February 2023 – February 2025*
- **Judge of CSE Battle of Intellects Spring-2025** *7th May, 2025*
